## Objective

Detail-oriented and solutions-driven Android and Flutter Developer with 3+ years of experience seeking a challenging role in IT where I can apply my mobile development expertise and contribute to innovative projects. Passionate about building scalable applications and enhancing user experience through modern UI/UX principles.

---

## Professional Summary

- 3+ years of hands-on experience in Android (Java) and Flutter (Dart) development.
  - Proficient in developing scalable cross-platform apps with state management using **GetX** and **Provider**.
  - Strong expertise in integrating **REST APIs** via **Retrofit** and **Volley**.
  - Solid understanding of **MVC** and **MVVM** architecture patterns.
  - Experience with **SQLite**, **MS-SQL**, and **Firebase** for database management.
  - Knowledge of **ASP.Net Core Web API** with token-based authentication.
  - Skilled in deploying apps to the **Google Play Store** and managing source control with **GitHub**.
  - Implemented barcode/RFID scanning solutions in warehouse and order management systems.
  - Implemented CI/CD workflows and managed code repositories using GitHub with multiple branches.
- 

## Technical Skills

**Languages:** Java, Dart, XML, JSON

**Frameworks & Tools:** Android SDK, Flutter, ASP.Net Core Web API, GitHub, Android Studio, FlutterFlow

**Databases:** MS-SQL, SQLite, Firebase

**API Integration:** Retrofit, Volley, REST APIs

**State Management:** GetX, Provider

---

## Professional Experience

### Software Engineer

#### Brilliant Info System Pvt. Ltd., Pune

*Oct 2022 – Present*

- Built high-performance Android applications using clean architecture principles.
- Developed ASP.NET Core APIs with secure token authentication.
- Integrated barcode scanners for warehouse automation and real-time inventory updates.
- Designed dynamic UIs and optimized app performance across devices.
- Created and managed complex SQL queries, stored procedures, and views.
- Successfully deployed applications to **Google Play Store** and **App Store**.

### Technical Support Engineer

#### Shivmani Info Tech Pvt. Ltd., Baramati

*Nov 2021 – Sep 2022*

- Delivered technical support and maintenance for enterprise-level applications.
- Collaborated with the development team to troubleshoot and resolve software issues.

---

## Key Projects

### Godrej – Mankind & Indigo (WMS Application)

**Technologies:** Android, Web API, SQL Server

- Developed a barcode-scanning Android app to manage warehouse operations (inbound/outbound/inventory).
- Integrated handheld terminals (HHT) and scanners for operational automation.

### Easy Cloud WMS

**Technologies:** Android, ASP.Net Core Web API, SQL Server

- Built a SaaS-based warehouse management system.
- Created secure APIs with token authentication and integrated real-time analytics via barcode and RFID scanning.

### Haldiram Inventory Management

**Technologies:** Android, Web API, SQL Server

- Automated inventory tracking using barcode and RFID hardware.
- Streamlined internal workflows and improved UI responsiveness.

## Easy Cloud OMS & DMS (Flutter)

**Technologies:** Flutter, Android, ASP.Net Core Web API, SQL Server

- Designed cross-platform apps for order and delivery management.
- Developed admin-to-end-user tracking system and deployed apps to production and app stores.

## Ecommerce Shopping App (Flutter)

**Technologies:** Flutter, Android, Firebase, Dart

- Designed and developed a cross-platform Ecommerce shopping application.
  - Implemented an admin-to-end-user order tracking system.
  - Developed a web-based admin panel for managing products, orders, and users.
  - Built user-facing Android and iOS applications for seamless shopping experiences
- 

## Education

### Bachelor of Computer Applications (BCA)

University of Pune, 2021

---

## Certifications

- Android Development – Udemy
  - Emerging Technologies in Computer Science
  - Soft Skills Development
- 

## Key Achievements

- Successfully deployed multiple apps to the **Google Play Store**.
  - Integrated barcode/RFID technology, improving warehouse efficiency by 30–40%.
  - Designed scalable, cross-platform mobile apps using **Flutter** and **Dart**.
- 

## Declaration

I hereby declare that the above information is true to the best of my knowledge.
